

Better Understanding. Better Support.

Nebraska Cancer Specialists uses Patient Discovery to better understand and support you.

As part of your care, we use a simple tool called **Patient Discovery** to help you share what's happening in your day-to-day life.

This could be anything that makes it harder to get to appointments, afford your treatment, pick up medications, or even cope with your treatment.

What's happening in your life matters to your care.

What you share goes directly to your **Nebraska Cancer Specialists care team** so we can understand what's important to you and how we can make things easier.

Please **take a few minutes to complete Patient Discovery** before your appointments because it helps us:

- **Understand** any challenges in your life
- **Connect you** to the right support and information
- **Make the most** of your time with your doctor
